AUSTRALIA

List Structure:

I. PREDECIMAL - COMMEMORATIVES & DEFINITIVES

Stamps are listed in approximately SG number order.

SG numbers in italics are contrived for clarity.

Predecimal stamps are notorious for their poor centring and poor perforations.

Short/pulled perfs are normal for low perf (P10 - 12½) issues.

Well centred &/or full perf copies will command a premium depending on the issue and availability.

SE TENANT ISSUES & SELF ADHESIVE ROLL STRIPS

The MUH, MLH & FU columns include all stamps as issued, ie *se tenant* when appropriate.

Note that self adhesive stamps are kiss die cut and, consequently, *se tenant* issues do not exist.

The FU singles column prices SINGLES of stamps issued *se tenant*, and those without tabs.

Since the 1970s, Australia Post has issued an ever increasing number of *se tenant* pairs, strips, blocks and P stamps.

They are largely aimed at stamp collectors and have little / no commercial application.

Postal use of these stamps is almost exclusively as singles from these combinations, apart from occasional philatelic use by collectors.

Even Australia Post's FDCs, packs and year albums now split strips & sheetlets thus destroying the *se tenant* combination.

Consequently, we are providing for both collectors who require *se tenant* combinations, and those who just require singles.

Please note that GST (currently 10%) is applicable from 1 July 2000.

International sales are GST free.
